

MAG500

Magnifying lights

Technology that's clear to see

Using two separate light sources this magnifier facilitates the inspection of items where a shadow aids the definition of features such as cavities. With easy bulb changing, a reach of 1000mm and flexible mount arrangements, the MAG500 is a high-quality light ideal for when a large viewing area is needed.

All DARAY magnifying lights are fitted to a smooth, fully enclosed, spring-balanced arm with a reach of up to 800mm and have an on/off switch located on the head.

The MAG500 models have a 175x130mm lens to give a large viewing area and 2x7 Watt lamps angled to optimise the illumination of the object.

Options/accessories

Mounting options	Pivot rail mount
